

## Call for Participation

# LSWT2024

12th Leipzig Semantic Web Day

<https://2024.dataweek.de/>

Dear colleagues,

The **12th Leipzig Semantic Web Day** (#LSWT2024) will once again be held in conjunction with the Data Week Leipzig on **April 18, 2024**, taking place in the heart of Leipzig.

Since 2009, LSWT has provided scientists, businesses, and organizations with a platform to exchange ideas on topics related to semantic technology. During LSWT2024, we will highlight the latest developments and trends in semantic technologies and data. The **focus topics** for this year include:

- Current challenges in the application of Large Language Models
- Semantic technologies and AI for industry and science
- Knowledge Graph use cases and sustainability
- FAIR Data and Data Catalogues
- Cybersecurity in Data Management
- Networked Society
- Resilient crisis-relevant supply networks

These topics will be presented in lectures by experts from both industry and academia. If you are interested in participating, we invite you to present your current work in a 15-minute talk. Presentations will be held in English. We particularly welcome contributions from women in the field of Data Science.

We look forward to your contributions to make this event a success!

**Please submit your presentation ideas by January 31, 2024**, to [lswt@eccenca.com](mailto:lswt@eccenca.com).

If you have any further questions, feel free to contact us.

We look forward to meeting you in Leipzig.

Best regards,

LSWT Organizing Team
